

# **JOEL WORKSHOP ORGANIZATION (JOWOG)/JEVTC**

## **PROJECT : MANUFACTURING OF SEED SOWING MACHINES**

### **01.RECENT MANUFACTURED SEED SOWING MACHINE WITH RIPPERS**

#### FEATURES;

01. It performs three operations simultaneously, digging, seed droppings and soil coverin
02. It can sow almost all varieties of seed sizes
03. The seed-rate can be controlled
04. The number of rows can be adjusted depending on requirements of particular crops
05. It has a pair of ripper system for two rows operation
06. It is designed especially for summer cultivation, where the soil is hard but can also be used in other seasons
07. The field does not need to be primarily prepared with a tractor.
08. It is designed to be operated with a powertiller

## 02.PREVIOUSLY MANUFACTURED SEED SOWING MACHINE WITHOUT RIPPERS

### FEATURES;

01. It performs three operations simultaneously, digging, seed dropings and soil coverin
02. It can sow almost all varieties of seed sizes
03. The seed-rate can be controlled
04. The number of rows can be adjusted depending on requirements of particular crops
05. It has a pair of digging (not rippers) system for two rows operation
06. It is designed especially for rain season cultivation, where the soil is soft.
07. The field does needs to be primarily prepared with a tractor.
08. It is designed to be operated with a powertiller or farm animals
